

## Experiment 11

### hardware compatibility

#### EXPERIMENT 11

change hardware compatibility of a VM (either by clone / create new one) which is already created and configures

Aim:- change hardware compatibility of a VM either by clone / create new one which is already created & configures.

Procedure:-

1. Install VM workstation
2. choose either cloned (or) creating new VM
3. select the VM in virtual machine workstation.
4. select VM Kmanager
5. Click on the change hardware compatibility
6. After that click next & finish
7. compatibility of hardware has been changed

Result:-

Hence changing hardware compatibility of virtual machine has been changed.
