

Experiment 7

virtual machine cloning

EXPERIMENT - 7

10/11/23
TUE

Create a snapshot & cloning of a VM and test it by loading the process previous session / cloned VM.

Aim:- To create a snapshot and cloning of a virtual machine & test it by loading the previous version.

Procedure:-

1. Install the Oracle Virtual Machine Box
2. Click machine from Oracle VM virtual box manager
3. Select clone in the machine option
4. Open clone virtual machine & asked to choose and optionally a folder of the new VM
5. The new machine will be a clone of the machine name.
6. Click next it gives the option to choose the type of clone
we may wish to create full clone, linked clone.
7. Choose full clone & click finish then the VM is created.

Result:- The snapshot & cloning of a virtual machine is created.
